

Home

The following guides are available to help you prepare your source data for processing within an Orion Health Solution.

Orion Health Solutions can be set up to process data using:

- Clinical Data Repository (CDR) only
- Data Engine (plus Data Spaces) only
- Both Clinical Data Repository (CDR) and Data Engine (plus Data Spaces)

These guides specify what data elements must be present in the source message or document and the expected values and formats. In addition, they specify what optional data elements may be included.

Source Data	Processor	Guide
HL7v2 Messages	Clinical Data Repository (CDR)	HL7 Messaging Implementation Guides
	Data Engine plus Clinical Data Spaces (CDS)	
Continuity of Care Documents (CCDs)	Clinical Data Repository (CDR)	Not Yet Available
	Data Engine plus Clinical Data Spaces (CDS)	Data Preparation Checklists for Clinical Data Spaces (CDS)
