

# Data Preparation Checklists

To accurately process a message or document, each Clinical Data Space (CDS) requires specific data elements to be present - in a specific format.

This section includes checklists that detail the Required and Optional data elements - and their expected format - for each Clinical Data Space (CDS).

It also includes a [Common Continuity of Care Document Elements](#) section that details specific CCD elements that are common to most of the supported domains.

Data Space Name	Data Preparation Checklists
Clinical:AllergyCdda	<a href="#">AllergyCCDA: Data Preparation Checklist</a>
